NSS

Northland Safety Solutions

April 2016

Introduction to **NSS**

Northland Safety Solutions was developed in March 2015 by Bruce Duden.

The main focus of **NSS** is to establish relationships with customers to identify current processes and procedures to better understand their fall protection exposures. Design and furnish safety solutions with the highest level of honesty and integrity that will ensure a safer working environment.

Since the establishment of **NSS** one year ago, we have installed a variety of fall protection applications for a number of marketplaces. We also perform Annual Inspections, user training and Re-certifications. Our focus of work is mainly in the Midwest but we have had customers located in Illinois, Kentucky, Florida and Oregon.

Bruce Duden is Chief Manager of **NSS**. He has been in the fall protection marketplace since 1994. He was General Manager of the engineered systems division for a major manufacturer for six years before becoming the Business Development Manager for a certified installer. He is now Chief Manager of **NSS**.

Justan Duden is Project Manager for **NSS**. He has been an Installation Technician overseeing the installation of engineered fall protection systems since 2002. He has a certificate of course completion for OSHA's 30 hour construction program and has completed Capital Safety's 'Basics of Fall Protection' class. He is also a licensed operator of aerial lift equipment.

Please contact us for any of your fall protection exposures.
