Seasonal Newsletter

Spring 2017

The 'solution' above provides safe access to a leading edge via non-penetrating guardrails.

The 'solution' above is a rigid form of fall protection designed to be used as fall-restraint for a building rooftop application.

The 'solution' below has permanently installed guardrail around the perimeter of a condenser with an aluminum access stairway.

2016 was a very busy year for Northland Safety Solutions! We continue to establish relationships with customers to better understand their fall protection needs and to help them provide a safer working environment for their employees.

To support our company's growing needs, we have added three new members to our 'team':

Mark Meyer, Project Manager

651.900.3798 mobile

mark@northlandsafety.com

Mike Lifo, Project Manager

715.308.7909 mobile

mike@northlandsafety.com

Mike Daniels, Installation Technician

Each of these new team members can be reached in our office at 507.263.9954 as well. Please feel free to contact us at any time if we can be of any assistance on your fall protection exposures.
